

TAKE YOUR
KAWASAKI
TO THE NEXT
LEVEL

Kawasaki introduced the first production stand-up PWC in October 1972. Since then, they have produced various different models and today they are able to offer everything from jet ski and entry models to luxury high performance watercrafts.

At Maptun Powersports VTECHTUNED, we are continually working on developing new hardware and new firmware to let you experience the thrills of riding your Kawasaki water craft. For 8 years we have been working with the engine control system that is installed in Kawasaki and that gives us complete control of all functions and features.

At present, we can offer a wide range of different tuning kits and also complete diagnostic support, everything to give you the best possible experience together with your Kawasaki.

When you choose Maptun, you can optionally purchase your own MaptunerX controller that enables you to easily switch between different software packages and also get free access to new software releases developed after the purchase date.

Your MaptunerX will always stay up to date since it will automatically update to latest firmware once it's connected and synchronized with our servers.

MAPTUNER[®]X

TAKE YOUR KAWASAKI TO THE NEXT LEVEL

With over 100 retailers worldwide and extensive use of MaptunerX, we can collect the necessary data needed to customise your tuning software for optimal performance and durability – no matter where or how you drive.

MaptunerX performs a so-called reflash. In short, MaptunerX first reads the original vehicle software to analyze and look up the various parameters such as load pressure, ignition timing, fuel, various types of restrictions, etc.

These parameters are then adapted to various conditions, such as the exhaust system, air kits, diffusers, climatic conditions, etc. This is one of the most complex ways to optimize the engine software - but undoubtedly the safest!

MaptunerX always uses the original vehicle software as the originating point, which means that the engine control unit is always aware of the increased power and thus at any point can adjust the inherent safety features originally programmed instead of defeating them or, as is often the case, ignoring them.

Maptuner is continually developing new features and support for new vehicles. Your MaptunerX will never become outdated because it automatically updates its firmware every time it is connected to a computer and synchronized with our server.

SPECS

20 V LED touch screen

480×272 pixel resolution

4 GB RAM

USB cable included

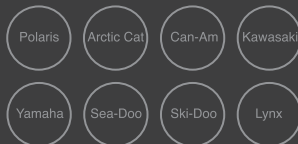

PC compatible

Can be used for an unlimited number of vehicles

Compact size, just 117 mm x 85mm

MAPTUNERX SUPPORTS NUMEROUS MAKES

MaptunerX supports snowmobiles, watercrafts, outboards and UTV/ATV from brands including Kawasaki, Sea-Doo, Yamaha, Ski-Doo, Lynx, Polaris, Can-Am and Arctic Cat. Additionally, we carry plenty of features and optimization kits for cars.

With MaptunerX, you can simply use the same device for all your vehicles!

TUNING KITS FOR KAWASAKI

This kit contains MaptunerX, USB- and Kawasaki-cabling, and a tuning license.

MaptunerX can be used for an unlimited number of vehicles; all you need is one (1) license per vehicle. Once the license has been activated for the vehicle, you gain free access to all the software plus the ability to switch between these as you like, including the original vehicle.

SX-R 1500

STAGE 1

Stage 1:
64mph/103kmh @ 8000rpm
Only tuning software

STAGE 2

Stage 2:
66mph/106kmh @ 8000rpm
Tuning software, cold air intake

ULTRA 310

Stage 1:
72mph/116kmh @ 7400rpm
Only tuning software

Stage 2:
74 mph/119kmh @ 7800 rpm
Tuning software, cold air intake.

ULTRA 300X

Stage 1:
71mph/114kmh @ 7800 rpm
Only tuning software

Stage 2:
73mph/117kmh @ 7900 rpm
Tuning software, cold air intake.

DIDN'T FIND YOUR KAWASAKI HERE?

These are the most popular models. We also offer tuning upgrades for most Kawasaki from 2007 and onwards. For all models, please visit maptunpowersports.com

DATALOGGER AND MONITORING

NOW AVAILABLE FOR KAWASAKI

The kit includes software, cables and broadband lambda sensor to read values in real time and save them whilst driving. Mega Log Viewer PC application for easy analysis of your data later!

Case and MaptunerX sold separately.

ACCESSORIES

In addition to our tuning kits we also carry accessories to improve both handling and performance as a retailer for Riva Racing - for a complete range of quality products for your watercraft!
