

UNLEASH
THE HIDDEN
POWER
OF YOUR
SEA-DOO

Sea-Doo has been the world leading brand of personal watercrafts since the early 90's. There are officially 5 categories of Sea-Doo models: Rec Lite, Recreation, Tow Sports, Luxury and Performance.

Sea-Doo can offer models with engine power from 60hp and all the way up to 300hp, in different embodiments.

At Maptun Powersports VTECHTUNED, we are continually working on developing new hardware and new firmware to let you experience the thrills of riding your Sea-Doo water craft.

For almost 10 years we have been working with the engine control system that is installed in Sea-Doo and that gives us complete control of all functions and features.

At present, we can offer a wide range of different tuning kits and also complete diagnostic support, everything to give you the best possible experience together with your Sea-Doo.

When you choose Maptun, you can optionally purchase your own MaptunerX controller that enables you to easily switch between different software packages and also get free access to new software releases developed after the purchase date.

Your MaptunerX will always stay up to date since it will automatically update to latest firmware once it's connected and synchronized with our servers.

MAPTUNERX

UNLEASH THE HIDDEN POWER OF YOUR SEA-DOO

With over 100 retailers worldwide and extensive use of MaptunerX, we can collect the necessary data needed to customise your tuning software for optimal performance and durability – no matter where or how you drive.

MaptunerX performs a so-called reflash. In short, MaptunerX first reads the original vehicle software to analyze and look up the various parameters such as load pressure, ignition timing, fuel, various types of restrictions, etc.

These parameters are then adapted to various conditions, such as the exhaust system, air kits, diffusers, climatic conditions, etc. This is one of the most complex ways to optimize the engine software, but undoubtedly the safest!

MaptunerX always uses the original vehicle software as the originating point, which means that the engine control unit is always aware of the increased power and thus at any point can adjust the inherent safety features originally programmed instead of defeating them or, as is often the case, ignoring them.

Maptun is continually developing new features and support for new vehicles. Your MaptunerX will never become outdated because it automatically updates its firmware every time it is connected to a computer and synchronized with our server.

SPECS

20 V LED touch screen

480×272 pixel resolution

4 GB RAM

USB cable included

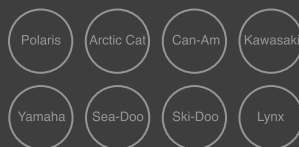

PC compatible

Can be used for an unlimited number of vehicles

Compact size, just 117 mm x 85mm

MAPTUNERX SUPPORTS NUMEROUS MAKES

MaptunerX supports Yamaha snowmobiles, watercraft, outboard and ATV/UTV. Other brands, including Sea-Doo, Ski-Doo, Lynx, Polaris, Kawasaki, Can-Am and Arctic Cat, are also supported. Additionally, we carry plenty of features and Optimization kits for cars.

With MaptunerX you can simply use the same device for all your vehicles!

TUNING KITS: NATURAL ASPIRATED

This kit contains MaptunerX, USB- and BRP-cabling, and a SPARK tuning license.

MaptunerX can be used for an unlimited number of vehicles; all you need is one (1) license per vehicle. Once the license has been activated for the vehicle, you gain free access to all the software plus the ability to switch between these as you like, including the original vehicle software. This also includes new software releases developed after your purchase of MaptunerX.

SEA-DOO SPARK

STAGE 1

Stage 1:
51mph / 82 kph @ 8350 rpm
Only Software

STAGE 2

Stage 2:
53mph / 85 kph @ 8500 rpm
Software, cold air intake and
upgraded impeller.

STAGE 3

Stage 3:
65mph / 104 kph @ 8900 rpm
VICTORY Turbo Kit with stock
engine internals.

E85

All stages above are also available
for E85 fuel.

MaptunerX

VICTORY TURBO KIT

Target RPM: 8800-9000 rpm • Boost for stock engine: 0,55-0,60 bar

Kit includes IHI Turbocharger, wastegate, MAP- Sensor,
injectors, exhaust, intercooler and air filter.

As well as all necessary mounts, joints, clamps and
hoses for proper installation.

TUNING KITS: SUPERCHARGED

This kit contains MaptunerX, USB- and BRP-cabling, and a STANDARD tuning license.

MaptunerX can be used for an unlimited number of vehicles; all you need is one (1) license per vehicle. Once the license has been activated for the vehicle, you gain free access to all the software plus the ability to switch between these as you like, including the original vehicle software. This also includes new software releases developed after your purchase of MaptunerX.

SEA-DOO RXT/GTX 300

MaptunerX

Software license

Cold air intake

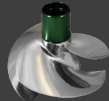

Stage 1:

79mph / 127 kph @ 8350 rpm
Only software.

Retainers

Impeller

Stage 2:

81mph / 130 kph @ 8500 rpm
Software, cold air intake and upgraded impeller.

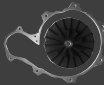

VT11 injectors

Stage 3:

84mph / 135 kph @ 8600 rpm
Software, cold air intake, upgraded impeller, XX Charger, VT11 Injectors, Retainers, Free Flow Exhaust.

XX Charger

Free flow exhaust

Higher tuning stages available, contact us for more information.

SEA-DOO RXP 300

MaptunerX

Software license

Cold air intake

Stage 1:

78mph / 125 kph @ 8350 rpm
Only software.

Retainers

Impeller

Stage 2:

80mph / 128 kph @ 8500 rpm
Software, cold air intake and upgraded impeller.

VT11 injectors

Stage 3:

83mph / 133 kph @ 8600rpm
Software, cold air intake, upgraded impeller, XX Charger, VT11 Injectors, Retainers, Free Flow Exhaust.

XX Charger

Free flow exhaust

Higher tuning stages available, contact us for more information.

SEA-DOO RXT/RXT-X 260

MaptunerX

Software license

Fuel Pressure Reg.

STAGE 1

Stage 1:

72mph / 116 kph @ 8000rpm
Only software

STAGE 2

Stage 2:

74mph / 119 kph @ 8350rpm
Software, cold air intake and upgraded impeller.

STAGE 3

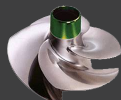

Stage 3:

77mph / 124 kph @ 8600rpm
Software, cold air intake, upgraded impeller, XX-2 Charger, VT11 Injectors, Fuel Pressure Regulator, Valve Train Upgrade, Free Flow Exhaust.

Higher tuning stages available, contact us for more information

73 mph / 117 kph @ 8300rpm
Software, Cold air intake,
upgraded impeller.

SEA-D00 GTI 130

2017-2019

STAGE 1

Stage 1: 62 mph / 100 kph
(stock 43 mph / 69 kph)
Only software.

STAGE 1

2020-

Stage 1: 60 mph / 97 kph
(stock 50 mph / 80 kph)
Only software.

SEA-D00 GTI 155 2017-2019

STAGE 1

Stage 1: 62 mph / 100 kph
(stock 60 mph / 97 kph)
Only software.

SEA-D00 GTI 170 2020-

STAGE 1

Stage 1: 60 mph / 97 kph
(stock 55 mph / 88 kph)
Only software.

DIDN'T FIND YOUR SEA-D00 MODEL IN THIS BROCHURE?

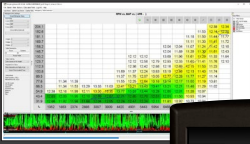

These are the most popular models. We also offer tuning upgrades for most Sea-d00s from 2004 and onwards, also Jetboat. For all models, please visit maptunpowersports.com

ACCESSORIES

In addition to our tuning kits we also carry accessories to improve both handling and performance. From our own brand and as a retailer for Riva Racing - for a complete range of quality products for your watercraft!

APPS AND PROGRAMS

DATA LOGGER KIT

Includes software, cables and broadband lambda sensor to read values in real time and save them whilst driving. Mega Log Viewer PC application for easy analysis of your data later!

BRP HOME SERVICE APP

- Reset Service
- Reset History
- Reset TPS
- DTC Codes
- DESS Key Management
- Monitoring

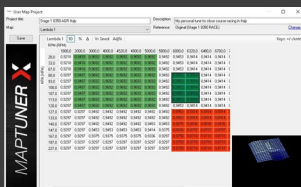

This is a single vehicle (VIN) license, it can only be used for one (1) specified vehicle.

DEALER SERVICE APP

The functions in MaptunerX are still the same but the benefit with Dealer Service Application is that it does not require separate licenses for each vehicle that will be overhauled/optimized/analyzed.

All functions is saved locally on the MaptunerX and will be activated directly when MaptunerX is connected to a new vehicle, without the need for computer with internet connection.

MAP EDITOR

Map Editor allows the user to create own adjustments in software such as boost pressure, throttle response, fuel, injection and more. We strongly recommend that MaptunerX Datalogger Kit is combined with Map Editor.

For PC.
